

Changa Safari Camp
Matusadona National Park
Lake Kariba, Zimbabwe

Co-ordinates
16°44'44.57"S
28°40'11.74"E

ACTIVITIES LIST

Fishing

Lake Kariba is the world's largest man-made lake, covering almost 5,600 square kilometers and this vast expanse of fresh water is home to some fantastic fish species including the famous Tiger fish, Tilapia bream, Catfish and the mighty Vundu. For most of the year, Lake Kariba is truly one of the greatest places in Africa for fishing.

Game Drives

Our open game vehicles are the perfect way to discover the area, providing a fantastic opportunity to see a variety of game, including lion, buffalo and elephant whilst taking in the beautiful scenery.

Boat Cruises

Relax and enjoy one of Lake Kariba's most popular activities and a favourite at Changa. Whilst drifting along the banks of the lake, you will also encounter some great wildlife sightings in their peaceful surroundings. What better way to end your day in Kariba, than listening to the sounds of hippo around you and witnessing an unforgettable sunset on the lake.

Bush Walks

One of the best ways to experience and feel a part of the African bush. Our professional guides have expert knowledge of the area and accompanied by them, you can be introduced to the Matusadona National Park in a completely different way. We recommend wearing neutral or "bush" coloured clothing and as the terrain can be uneven and rocky, comfortable walking shoes and socks are required.

Sanyati Gorge Visits

A short boat ride across the lake will bring you to the scenic Sanyati Gorge, where you can meander peacefully through the steep cliffs for up to 10 km. The Sanyati Gorge is both unspoilt and undisturbed. Don't forget your camera and binoculars for this activity as the dramatic landscape will leave you speechless.

Birding

Bird watching can be done on either a gentle boat cruise or a game drive in the morning or afternoon. The birdlife in the park is prolific, with 350 different species identified in the area including ducks, herons, plovers and storks that congregate along the waterfront and darters and cormorants who use the dead tree base for their fishing forays. Other adept fisherman are ospreys and the iconic African fish eagle who is often seen perched majestically on a high branch and whose clear, ringing call has to be the most characteristic and evocative sound on Lake Kariba.
